

Powering ON / OFF instructions

Please read before proceeding

TRANSMITTER (Flashlight)

Unscrew the rear of the flashlight and remove the battery holder

Insert 3 x AAA batteries

Slide the battery holder back into the body, in the direction of the arrow (A) on the holder

Test the light

RECEIVER (Solar Panel)

NOTE: There are TWO energy sources

1. Open the battery compartment (B) and insert 2 x AA batteries (as indicated)

2. Charge the lithium battery inside the speaker using the 5V USB charge connector (C). Charge at least one hour

Turning the Receiver ON/OFF

ON: Activate the **red switch** (D) and slide the **black switch** (on the side of the speaker, (E)) **towards the solar panel**

OFF: De-activate the **red switch** (D) and slide the **black switch** (E) to the opposite end
